

RECIPROCATING COMPRESSOR

K-Series

K – series

Represent the new design of multicylinder compressors. This design allows direct coupling with 4-pole motors , making it ideal for applications requiring small size, light weight and high speed.

K – Series compressors have built-in piping for lubrication and unloader operation so there is no external piping at all. They are specifically designed for use of the ozone friendly refrigerants. This equipment is competitively priced and suitable for both industrial and commercial applications, insuring low running and maintenance costs.
